

TBIPros_{LLC}

Traumatic Injury Litigation Experts

About Us:

TBI Pros LLC , as a company, is primarily focused upon assisting physicians and attorneys with catastrophically injured clients within the outpatient setting throughout the personal injury litigation process. We are a team of highly skilled and specialized expert nurse consultants who have extensive experience with catastrophic and traumatic brain injury (TBI) care.

Issues Facing Personal Injury Attorneys & Their Injured Clients:

The outpatient healthcare system has many inherent flaws for catastrophically injured and TBI patients, all of which have been worsened by COVID. TBI and catastrophically injured patients are inherently poor historians and frequently struggle to accurately describe their symptoms to their physicians, thereby significantly hindering proper medical diagnosis. This leaves personal injury patients both medically and legally disadvantaged, thereby hindering accurate medical record documentation in personal injury cases.

Without a doubt, TBI Pros LLC not only addresses these issues, but also ensures that your clients have a strong expert nurse consultant and advocate throughout the personal injury process who will not only significantly help and assist your truly injured clients, but our nurses strive as their primary role to promote the accuracy of the medical record, which is extremely helpful to your client's physicians as well as to the litigation.

Our Services:

- Identifying & Solving Complex Challenges in Catastrophic & TBI Cases
- Providing Accurate Medical Meritorious Review of Total Client Injuries
- Developing Complex Patient Care Plans
- Identifying Speciality Care Providers Needed
- Addressing and Solving Complications in Catastrophic Cases
- Solving Complications in Complex Cases
- Evaluating Future Life Care Planning Patient Needs

Tiers of Service:

1 Tier 1: Primarily for **multimillion-dollar cases (\$500K or more)**, Tier 1 includes all services from Tiers 2 and 3, along with ongoing, personalized case management to navigate complex outpatient clinical settings for TBI and catastrophically injured clients throughout the litigation process.

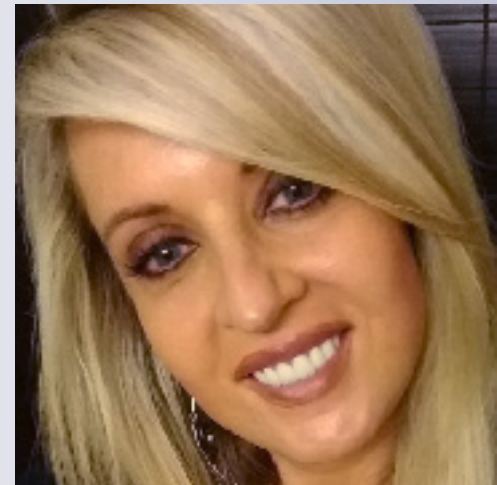

2 Tier 2: Typically used for **cases valued between \$100K to \$500K**, Tier 2 builds on Tier 3 by providing assistance in establishing care with various specialty providers and with the option of additional expert nurse assistance if the client's care becomes challenging.

3 Tier 3: This tier offers a **thorough forensic and medical meritorious review of the client's injuries in all personal injury cases** and includes a specific outpatient care plan development as well as the identification of specialty care providers likely needed within the medical litigation workup of each case.

About Tracey Thomas, Chief Nursing Officer

Ms. Thomas is the founder and creator of TBI Pros LLC, which is specifically designed to assist catastrophically injured & TBI patients. Ms. Thomas is a Chief Nursing Officer, Senior Health Care Policy Analyst, Legal Nurse & Expert Nurse Consultant. As a direct patient advocate, Ms. Thomas assists in creating comprehensive patient care plans, reviewing the medical necessity of care, and adjudicating the standards of care within various health care and legal settings.

Additionally, Ms. Thomas is also the founder and author of a professional health-care development theory entitled, The Art of Advocacy, which is designed to promote and improve patient care and healthcare delivery throughout the United States. As the author and founder of this theory, Ms. Thomas has served as a guest and keynote speaker within several legal and healthcare-related settings.
